

DragonPay via iPay88

PaymentId for each of the DragonPay method.

18 - DragonPay Online

19 - DragonPay OTC Non Bank

20 - DragonPay OTC Bank

Response Status

1 - Success

0 - Fail

6 - Pending

Since DragonPay is not a real time payment method, the initial response status value is **6** (it will be sent in your Response URL only).

Once iPay88 got confirmation that transaction is success, the response status value will be **1** (latest response data will be sent in your Backend URL).

Backend URL

iPay88 will only return RESPONSE data for "**payment success**" to merchant BackendURL when the order is paid success by user.

The format of the set of response data is the same with what is in the API.

Ensure that your BackendURL is well implemented in order for your system to receive the data from iPay88.

Amount

Minimum amount of DragonPay to process is P50.00
